PREFACE

The Labour Force Survey (LFS) is a household survey of private dwelling units targeting all persons 16 years and over. The purpose of the LFS is to measure and assess the current labour force and the economically inactive population.

This report of the LFS is based on data collected from the May 2025 Survey. It presents Survey highlights, concepts and definitions, Survey methodology, summary counts, detailed tabulations, indicators and the questionnaire. Users can download copies of the LFS Report from the Bermuda Government portal at <https://www.gov.bm/employment-statistics>. For more detailed tables than those published in this report, please contact the Department of Statistics, Business Division, at email address jjackson@gov.bm or tcbean@gov.bm. Alternatively, further information can be obtained by contacting the Department at 297-7761.

Melinda Williams
Director of Statistics
March 2026

TECHNICAL NOTE

Household Replacement Method

The May 2025 LFS did not incorporate the household replacement methodology. Households were invited to send their contact information to the Department of Statistics to facilitate a telephone interview. Households that did not supply contact information were given several attempts to participate in the Survey by in-person visit.

Inter-survey Comparisons

The May 2025, November 2024 and May 2024 Labour Force Surveys employed the same data-collection methods, sampling methodology, and weighting approach. Therefore, results from the three surveys are methodologically comparable. However, because the data have not been seasonally adjusted, observed differences may reflect seasonal variations in employment patterns rather than true changes in underlying labour-market conditions. Users are encouraged to interpret comparisons with this in mind.

Weighting Matrix

In line with statistical best practices, ages were grouped in some cases to weight the LFS results. This approach ensured that there were observations in every cell of the weighting matrix and avoided understating the estimated population aged 16 years and over. For the LFS results, age, sex, and Bermudian status were used in the weighting matrix.

Note: In some tables, figures may not add to totals due to rounding.

LABOUR FORCE SURVEY METADATA

	May 2025	Nov 2024	May 2024
Sampling Frame	The list of private dwelling units from the Department of Land Valuation	The list of private dwelling units from the Department of Land Valuation	The list of private dwelling units from the Department of Land Valuation
Confidence Level	95%	95%	95%
Margin of Error	±2.5%	±2.5%	±2.5%
Sample Size Selected	1,497	1,536	1,512
Total Completed Households	1,090	1,187	1,118
Data Collection Method	Telephone and Field	Telephone and Field	Telephone and Field
Household Replacement Method	None	None	None
Response Rate	86% ¹	88% ¹	86% ¹
Non-response Imputation	No	No	No
Population Base	May 2025 Population Projections	Nov 2024 Population Projections	May 2024 Population Projections
Weighting Matrix	Age, sex and Bermudian Status	Age, sex and Bermudian Status	Age, sex and Bermudian Status

¹ The response rate calculation as defined in this report was introduced in the May 2022 LFS. Response rates for prior years did not take into account eligibility in the denominator of the calculation. The response rate was based on the number of completed households and the sample size.

CONCEPTS & DEFINITIONS

Confidence Level

The probability that a survey result falls within the margin of error. A confidence level of 95% with a margin of error of $\pm 2.5\%$ indicates that the result would be within 2.5% of the true value 95% of the time.

Economically Inactive

The economically inactive includes all persons 16 years and over in the population who, during the reference period, were neither employed nor unemployed.

Eligible Dwelling Unit

Potential respondents who match the target sample. For this survey, these are private households containing at least one person 16 years of age or older residing or intending to reside in the private dwelling unit for six months or more as of the reference day.

Employment Rate

The employment rate is calculated as the ratio of employed persons aged 16 to 64 to the population of the same age.

$$\text{Employment Rate} = \frac{\text{Employed Persons 16 to 64 Years}}{\text{Population Projections 16 to 64 Years}} \times 100$$

Median Gross Annual Income from Main Job

Median gross annual income is the amount which divides the income distribution into two equal groups, half having incomes above the median, half having incomes below the median. The median is based on annual income before deductions from the following sources: wages, salaries, commissions, bonuses, tips and net earnings from own business for the self-employed. The income data relates to the working population including full- and part-time workers regardless of the number of hours and months worked.

Household

A household is a person or group of persons living together in a private dwelling unit.

Ineligible Dwelling Unit

Potential respondents who do not match the target sample. For this survey, examples include vacant dwellings, derelict dwellings, group dwellings, institutions, etc.

Labour Force

The labour force refers to persons of working age who were 16 years or older during the Survey reference week and were either gainfully employed or looking for work.

Labour Force Participation Rate

The labour force participation rate is the percentage of the population 16 to 64 years who were either employed or unemployed.

$$\text{Labour Force Participation Rate} = \frac{\text{Labour Force 16 to 64 Years}}{\text{Population Projections 16 to 64 Years}} \times 100$$

Main Job

A person's main job is one where he or she receives health insurance and pension benefits.

Margin of Error

The degree to which the results represent the true value for the entire population. A +/- 2.5% margin of error indicates that the result is within 2.5% of the true value.

Permanent Job

A permanent job is one that does not have a predetermined end date of employment.

Private Dwelling Unit

A private dwelling unit is a room or group of rooms used, or intended to be used, for living purposes. It must be capable of permanent human habitation and must have its own:

- separate access to the street or common landing or staircase, and,
- cooking, living, sleeping and sanitary facilities which the occupants of the dwelling do not have to share with any persons other than their own household members.

From a structural perspective, a private dwelling may be contained within a one-unit dwelling, a house comprising two or more apartments, an apartment building or within part of a building which is used for residential as well as business or other purposes.

Response Rate

For the May 2025 Labour Force Survey, the response rate is calculated as the ratio of dwelling units that responded to the Survey to all eligible dwelling units and dwelling units whose eligibility could not be determined.

$$\text{Response Rate} = \frac{\text{Dwelling units responding}}{\text{Dwelling units eligible} + \text{Dwelling units with eligibility undetermined}} \times 100$$

**Sample**

A sample is a subset of a sampling frame where elements are selected based on a randomized process with a known probability of selection.

Sampling Frame

The sampling frame is the list of all private households. Updates are based on information from Population and Housing Censuses and the Department of Land Valuation.

Sampling Pool

A sampling pool is the set of elements selected from a sampling frame that may be used in completing the data collection for a survey.

Seasonal Adjustment

A statistical technique that attempts to measure and remove the influences of predictable seasonal patterns, such as changes in the weather, holidays, school schedules to reveal how employment and unemployment change from month to month.

Temporary Job

A temporary job is one that is set to expire at some stage of a work project or at a date specified by an employer.

Unemployed

The unemployed are all persons 16 years and older who during the reference period were without work but were willing and able to work for pay and who were actively seeking work.

Unemployment Rate

The unemployment rate is the number of unemployed people 16 years and over as a percentage of the labour force 16 years and over.

$$\text{Unemployment Rate} = \frac{\text{Unemployed 16 Years and Over}}{\text{Labour Force 16 Years and Over}} \times 100$$

Underemployment

The International Labour Organization defines underemployment in general terms as the underutilization of the productive capacity of the employed population. The underemployed population is a subcategory of the employed population and is identified by comparing their current employment situation with an “alternative” employment situation that they are willing and available to carry out. Persons who are in underemployment are those who worked or had a job during the reference week but were willing and available to work “more adequately”.¹

There are three categories of underemployment:

- **Time-related underemployment** occurs when an employed person desires to work in alternative employment that provides sufficient number of work hours, more convenient work hours or permanent employment.
- **Skills-related underemployment** occurs when a working person desires an alternative employment position in which they can use the skills and or qualifications they possess which are not being used in their current employment.
- **Income-related underemployment** includes working persons who desire more pay than they are receiving in their current job from an alternative employment position.

Usual Household Member

A person who resides or intends to reside in Bermuda and the household for six months or more.

Working Population

The working population or the employed comprises all residents 16 years and over who during the reference week met the following requirements:

- They performed some work for pay, profit or family gain, in cash or in kind; or
- They were temporarily absent either from a job in which they had already worked and to which they maintained a formal attachment or from a self-employment activity such as a business enterprise, a farm or a service undertaking.

¹ International Labour Organization definition of the underemployed (<https://www.ilo.org/global/statistics-and-databases/statistics-overview-and-topics/underemployment/current-guidelines/lang--en/index.htm>)

SURVEY METHODOLOGY

Sampling Design

The LFS is a household survey of private dwelling units with a sample of 1,497 households. This sample size was determined to be sufficient to achieve the desired level of accuracy and precision. It represents approximately 5% of the 33,065 private households in the sampling frame. The design supports results at the 95% confidence level with a margin of error of $\pm 2.5\%$, assuming full eligibility and response.

The sampling frame for the Survey was a combination of the data files linked to the 2016 Population and Housing Census and the addition of new assessment numbers from the Department of Land Valuation. The sample design used for the May 2025 LFS was a stratified two-stage approach as follows:

Stage one – Using the 2016 Census results, households were arranged into one of three income groups: low (under \$84,001), medium (\$84,001 - \$102,750) and high (\$102,751 and over).

Stage two – Random selection of the desired number of private dwelling units from the Land Valuation list in proportion to the 2016 Census income level.

Publicity

Prior to the commencement of data collection, 1,497 letters were mailed to households notifying them that they were selected to participate in the LFS.

Data Collection

Information was collected on behalf of all usual household members. The Survey reference day was May 20, 2025 and the Survey reference week was May 13 to 19, 2025. Data collection occurred from July 14, 2025 to November 14, 2025. The data collection methods were Computer Assisted Personal Interviewing with laptops using softphone technology and Paper-and-Pencil Personal Interviewing. Eight interviewers conducted telephone interviews and field interviews. Permanent staff conducted the training and supervised interviewers.

Response Rate

By the end of the data collection period, 1,090 households had completed the Survey and 407 had not. Please see the chart overleaf for more details. The response rate was 86% of all eligible units and units with unknown eligibility in the sample.

MAY 2025 LABOUR FORCE SURVEY RESPONSE RATE ILLUSTRATION

Data Processing

After the interview phase, the data was exported into Microsoft Excel for manual coding of variables. The data was converted to a text file format to produce tables. The next step included the evaluation of tabular outputs, weighting and the production of the final tabulations.

Weighting

The Survey data was weighted by using the May 2025 population projections. The population weights were derived by dividing the May 2025 age, sex and estimated Bermudian status projected population counts for persons 16 years and older by the age, sex and Bermudian status counts from the May 2025 LFS.

NOTE: Readers should note that there are small disparities in the population totals presented in the tables of this report. This is a result of the grossing up effect of the weights on the sample data.

$$\text{Population Weight} = \frac{\text{Projected Population (age, sex \& estimated Bermudian status)}}{\text{Current Count of LFS respondents (age, sex \& Bermudian status)}} \times 100$$

COMPARISON OF MAY 2024 TO MAY 2025 LABOUR FORCE SURVEY RESULTS

- The average hours worked per week in main job increased from 41.3 to 41.4.
- The median gross annual income from main job increased from \$73,157 to \$77,573.
- The labour force participation declined from 82.8% to 82.2%.
- The employment rate dipped from 81.4% to 80.7%.
- The unemployment rate rose slightly from 1.6% to 1.7%.
 - The unemployment rate for Bermudians rose from 1.6% to 2.1%.
 - The unemployment rate for persons aged 16 to 24 years increased from 2.4% to 9.3%.

SAMPLE

Name: (first)

SECTION 1 - TYPE OF TENURE

H1. Is this dwelling unit owner-occupied or non-owner occupied?

Owner-occupied

- 1 Owned by you or another household member with a mortgage / loan
- 2 Owned by you or another household member without a mortgage / loan

Non-owner-occupied

- 3 Rented as partly / fully furnished for cash
- 4 Rented as unfurnished for cash
- 5 Occupied without any household member paying any cash rent
- 9 Not stated

P3a. Please tell me which age group you are in.

(I will read a list, please stop me when I read your age group.)

- 1 16 to 24
- 2 25 to 34
- 3 35 to 44
- 4 45 to 54
- 5 55 to 64
- 6 65 to 74
- 7 75 +
- 9 Not stated

P4. Which racial group do you belong to?

- | | | |
|---------|-----------------|---------------|
| 1 Black | 4 Black & White | 7 Other Races |
| 2 White | 5 Black & Other | 9 Not stated |
| 3 Asian | 6 White & Other | |

SECTION 2 - CHARACTERISTICS

P1. How are you related to the household reference person?

- ① Household Reference Person

Relative

- 2 Husband/ wife
- 3 Child
- 4 Grandchild
- 5 Father/ mother
- 6 Grandparent
- 7 Parent-in-law
- 8 Son-/ daughter-in-law
- 9 Brother / sister
- 10 Another relative

Non-Relative

- 11 Live-in partner
- 12 Foster child
- 13 Other non-related
- 99 Not stated

NOTE: Step and adopted persons should be recorded under the relevant category.

P2. (For persons not seen ask) Are you male or female?

- 1 Male
- 2 Female

P3. What was your age on May 20, 2025?

YEARS

--	--	--

(Not stated = 999)

If answer is provided then skip to P4

P5. Were you Bermudian or non-Bermudian on May 20, 2025?

Bermudian

Bermudian

Non-Bermudian

- 1 Permanent Resident Certificate Holder
- 2 Non-Bermudian Spouse of a Bermudian
- 3 Other Non-Bermudian
- 9 Not stated

SECTION 3 - HEALTH

P6. Which response best describes your overall health insurance coverage by a Government or private plan?

- 1 Major Health Coverage (Private or GEHI)
- 2 Only Private Basic Health Coverage
- 3 Only the Government's HIP
