

## RATE OF INFLATION UNCHANGED

Consumers paid 0.7 per cent less than they did a year ago for the basket of goods and services included in the Consumer Price Index (CPI). The annual rate of inflation remained unchanged from the previous month.

Between August and September 2020, the average cost of goods and services in the CPI declined 0.4 per cent. The all-items index fell from 105.8 to 105.4 in September. This means that the basket of goods and services that cost \$100.00 in April 2015 now costs \$105.40.

## YEAR-TO-YEAR ANALYSIS

The Rent sector continued to have a strong influence on the annual rate of inflation (-4.2 per cent) as properties not subject to rent control declined 9.5 per cent year-over-year.

The Transport & Foreign Travel and Fuel & Power sectors also impacted strongly on the annual rate of inflation as price reductions in these sectors were 5.3 per cent and 5.8 per cent, respectively.

**Annual Inflation Rate -0.7%**

The compilation of the CPI involves the processing of several thousand price quotations. The Department of Statistics wishes to acknowledge the cooperation of the business community in supplying the required price data.

SUMMARY STATISTICS					
Period	Monthly		Period	Quarterly	
	Index	Annual per cent Change		Index	Annual per cent Change
<b>2019</b>			<b>2018</b>		
Sept	106.1	+0.8	Q1	104.1	+1.8
Oct	105.9	+0.7	Q2	105.0	+1.8
Nov	105.9	+0.9	Q3	105.2	+1.2
Dec	105.4	+0.5	Q4	105.0	+0.9
<b>2020</b>			<b>2019</b>		
Jan	106.3	+1.0	Q1	105.3	+1.2
Feb	106.1	+0.9	Q2	105.7	+0.7
Mar	105.9	+0.3	Q3	106.4	+1.1
Apr	106.0	+0.0	Q4	105.7	+0.7
May	105.8	+0.4	<b>2020</b>		
June	105.7	+0.0	Q1	106.1	+0.8
Jul	105.2	-1.4	Q2	105.8	+0.1
Aug	105.8	-0.7	Q3	105.5	-0.8
Sept	105.4	-0.7			

**MONTH-TO-MONTH ANALYSIS**

**Tobacco & Liquor**

The Tobacco & Liquor sector rose 0.9 per cent for the month. The average cost of wines and beer rose 2.7 per cent and 0.2 per cent, respectively.

**Food**

The Food sector grew 0.3 per cent in September. Notable price changes occurred in the average cost of fresh and frozen turkeys (+5.7 per cent), bagged apples (+2.3 per cent) and roasting chickens (+1.8 per cent).

**Education, Recreation, Entertainment & Reading**

The Education, Recreation, Entertainment & Reading sector climbed 0.1 per cent. The average cost of tuition fees for overseas colleges climbed 1.3 per cent

**Household Goods, Services & Supplies**

Fuelled by the average cost of bedlinens (+5.6 per cent) and detergents & bleaches (+2.0 per cent), the Household Goods, Services & Supplies sector was up 0.1 per cent for the month.

**Health & Personal Care**

The Health & Personal Care sector was flat for the month. An increase in the average cost of prescribed medicines (+0.2 per cent) was offset by the average cost of self-prescribed medicines and household medical supplies (-0.1 per cent).

**Clothing & Footwear**

The Clothing & Footwear sector reported no price movement for the month.

**Fuel & Power**

The Fuel & Power sector was static.

**Transport & Foreign Travel**

The Transport & Foreign Travel sector dipped 1.3 per cent in September. The average cost of overseas car rentals and overseas hotels declined 11.8 per cent and 7.2 per cent, respectively.

**Rent**

Following the 0.3 per cent increase in August, the Rent sector lost ground in September, falling 1.3 per cent. The average cost of properties not subject to rent control slid 2.9 per cent.

**COMPUTING PRICE INCREASES**

The Department of Statistics receives calls daily requesting the rate of inflation over specific periods of time. The following calculations are provided to guide users as to how to compute rates of price increases. The monthly index numbers can be obtained from our website: <https://www.gov.bm/departement/statistics>.

**A) Month-to-Month Price Change**

The price change between November and October, 2015 is calculated as follows:

$$= \frac{\text{Nov 15 index} - \text{Oct 15 index}}{\text{Oct 15 index}} \times 100$$

$$= \frac{100.5 - 100.6}{100.6} \times 100$$

$$= -0.1\%$$

**B) Year-to-Year Price Change**

The price change between December 2015 and December, 2014 is calculated as follows:

$$= \frac{\text{Dec 15 index} - \text{Dec 14 index}}{\text{Dec 14 index}} \times 100$$

$$= \frac{100.5 - 98.7}{98.7} \times 100$$

$$= 1.8\%$$

**C) Particular Period Price Change**

The price change between April 2014 and January, 2016 is calculated as follows:

$$= \frac{\text{Jan 16 index} - \text{Apr 14 index}}{\text{Apr 14 index}} \times 100$$

$$= \frac{100.3 - 98.3}{98.3} \times 100$$

$$= 2.0\%$$

## WHAT IS THE CONSUMER PRICE INDEX?

The Consumer Price Index (CPI) is a statistical tool used for measuring changes in the general level of prices of consumer goods and services purchased by private households.

The index measures price movements of a given quality and quantity of goods and services. The mix of these consumer goods and services comprising the index, are figuratively thought of as a “shopping basket.” In constructing this “shopping basket”, the selected goods and services are organized first by commodity type. They are then divided into sub-components and assigned to a major expenditure group. The Bermuda CPI is structured into nine expenditure groups or sectors:

- Food
- Rent
- Clothing & Footwear
- Tobacco & Liquor
- Fuel & Power
- Transport & Foreign Travel
- Household Goods, Services & Supplies
- Education, Recreation, Entertainment & Reading
- Health & Personal Care

## CONCEPTS AND DEFINITIONS

### Base Period

The time period which is used as a reference point for measuring the price change of goods and services. The base period for the Bermuda CPI is April 2015.

### Price Index Number

A single figure that shows how a set of prices has changed over a specified period of time. An index number on its own means nothing. It must be compared with an index number from another period to have meaning. For example, a comparison of the index number 97.2 for January 2014 with 100.4 for January 2016, reveals that prices have increased by 3.3 percent.

### Laspeyres Equation

The CPI is computed using this statistical equation. This formula calculates the total amount of money a household needs today to purchase the same basket of goods and services that it bought in the base period, April 2015.

## WEIGHTED AVERAGE

A mathematical formula that takes into account the relative importance of an item’s price change compared to the overall change in the sector or CPI.

### Inflation

Inflation is the process of rising prices, resulting in diminishing purchasing power of a given sum of money.

### Cost of Living Index

Many individuals refer to the CPI as a cost-of-living index. The CPI is an index of pure price change only. A cost-of-living index reflects the changes in buying or consumption patterns that consumers would ordinarily make to adjust to any change in the price of a good or service.

## A COMPARISON OF RATES OF INFLATION (%) Selected Countries & Bermuda

	2016	2017	2018	2019	Sept 20
<b>Bermuda</b>	+1.5	+1.9	+1.4	+1.0	-0.7
<b>United States<sup>1</sup></b>	+1.3	+2.1	+2.4	+1.8	+1.4
<b>Canada<sup>2</sup></b>	+1.4	+1.6	+2.3	+1.9	+0.5
<b>United Kingdom<sup>3</sup></b>	+1.8	+3.6	+3.3	+2.6	+1.1
